AquaJet

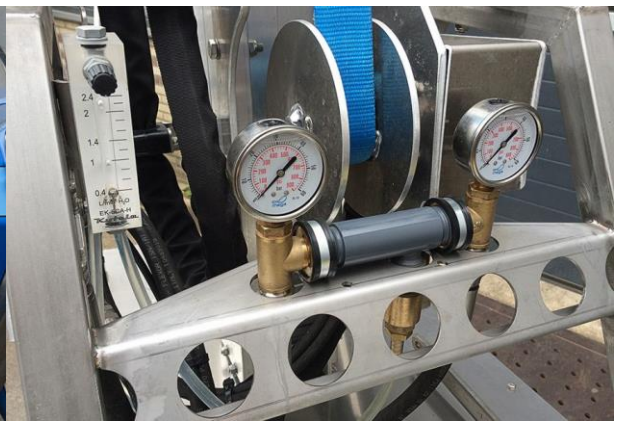

The greenhouse deck cleaner for inside greenhouses and gutters.

The AquaJet has been specially developed to be able to start in a spotless greenhouse after each growing season. The AquaJet cleans the inside of your greenhouse quickly and thoroughly during a crop change.
Driving over the pipe rail system, the AquaJet applies cleaning or disinfecting agents to the inside of your greenhouse deck and then sprays it clean under high pressure. The AquaJet works without cables, is hydraulically driven and can be supplied with an infinitely extendable mast. Thanks to this mast, the greenhouse deck can be cleaned and disinfected up close, for an optimal result. Optional is a module with which you can clean cultivation gutters; an enormous labour saving! The machine is easy to operate.

Specifications

- Track gauge: 425-600 mm.
- Drive: hydraulic.
- Hose reel: suitable for 150 m hose of 1 inch.
- Water pump: 83 l/min membrane pump at 45 bar.
- Driving speed: infinitely variable up to 60 m/min.
- Weight: approximately 550 kg.
- Capacity: cleans approximately 1 hectare of greenhouse deck/facades per day.

Standard equipment

- Stainless steel frame.
- 18 hp petrol engine.
- Membrane pump.
- Hose reel with 150 meter hose.
- Hydraulically extendable spray mast up to 5.80 metres working height, with 2 Casotti shuttle nozzles (80 liters).
- Adjustable base for various centre sizes of the tubular rail system.

Extra options

- Injection unit for cleaning agent with additional nozzles and injectors.
- Extended spray mast up to a working height of 7.10 metres.
- Hydraulic folding mast for greenhouses with low hanging crop wires.
- Pressure boosting pump for water supply from pouring tap to hose reel.
- Gutter cleaner.
