BUWAcone Roof System

Conical steel top of the water storage tank.

The BUWAcone tank roof is a strong solution for covering water storage systems. This BUWAcone roof is the optimal solution for covering midsize tanks. It is designed without a support system in the middle. So there will be no extra support needed. An aluminium frame is supporting the roof outside the tank wall. The roof exists of special designed aluminium profiles and in-between there are foil roof parts installed. The BUWAcone can be easily installed with standard tools only. The BUWAcone is even designed to hold up to 75 kg snowload/m^2 on top.

Advantages

- Complete closed water storage.
- The roof is snow load proof up to 75kg/m^2.
- Liners of the water storage tank can be replaced without removing the BUWAcone roof.
- Keeps birds, pollution, UV radiation, and rain water outside the water storage tank.
- Quick and easy installation.
- No central support construction inside the tank.
- Available for tank diameters from 10-18 meter.
- Aluminium elements designed with max 2,30 meter lengths.
