CAF45-serie

For optimal air distribution in your greenhouse

Air humidity that is too high in the greenhouse is a significant problem in horticulture. It increases the risk of illness and infection. The energy-efficient CAF45 recirculation fan brings air flow to the greenhouse. Gentle air movement has a drying effect on the cannabis plant, which reduces the disease pressure. In addition, it also leads to an even temperature distribution in the greenhouse. This creates balanced growth.

Advantages

- Throw minimum 40-metre (at full speed and 0 Pa)
- The fan speed can be regulated so you can control the air flow speed.
- This fan uses high-quality materials and a motor that is globally-recognized for its quality. This makes the CAF45 recirculation fan a very reliable fan at an attractive price.
- Compliance to ERP2015 standards
- Fan duct coating is of Dutch top-quality
- Including 3-metre connection cable (for 115V and 230V model)
- Diameter ventilatorkoker: 450 mm
- Thermal protected
- Protection class: IP54

Options

- Available in 115 V, 230 V and 400 V (380 V-480 V)
- Available in 50 Hz- and 60Hz-models
- Including 3-metre connection cable (for 115V and 230V model)
- Speed adjustable with an optional speed regulator
- Various types of mounting brackets optionally available
