Floor scrubbers

Designed for large surfaces

We as CannaTechnics can deliver all kinds of floor scrubbers. In this leaflet you will find the most commonly used floor scrubbers for Greenhouses. If you want to know more about floor scrubbers or if you want a floor scrubber for specific applications, please contact us. In this leaflet you will find only sit on floor scrubbers because most greenhouses are to big for walk-after floor scrubbers.

Floor scrubber ICM 38 UT

The ICM 38 UT is the absolute heavyweight in the range of floor scrubber driers. The very solidly built ICM 38 UT scrubber drier is the perfect solution for major cleaning. Separate engines are used for all drives – a key feature of all ICM scrubbers.

The very high (110kg) brush pressure and high vacuuming capacity make the cleaning results of this scrubber absolutely perfect

Advantages

- Powerful
- 60 kg brush pressure
- Reliable

Specifications

Type:	Accu
Working width:	950 mm
Fresh water tank:	190 litre

Floor scrubber ICM 42/60 UT

The ICM 42UT and 60UT floor scrubbers are the two power players in our range of floor scrubbers. Their large working width (120 and 150 centimetres) makes them perfect for cleaning large surfaces.

Features

Both scrubbers have 340-litre water content for clean water and wastewater; you can clean large surfaces without refilling the water. Available in battery, diesel and LPG design. The brushes are installed at the front of the scrubber, allowing you to clean the hard-to-reach places easily and giving you a perfect view of your cleaning work. Both floor scrubbers can be equipped with a stainless steel sweeping unit, ensuring that any small dirt, such as pieces of pallet, wood, scraps of paper and other dirt, can be cleaned immediately without needing to pre-sweep first. The scrubbers have a brush pressure of 150kg, causing any dirt to disappear immediately (in combination with the right detergent).

Advantages

- Designed for large surfaces
- Thorough cleaning
- Reliable

Specifications

Type:	Accu / Diesel / LPG
Working width:	1.150 mm of 1.500 mm
Fresh water tank:	340 litre

Floor scrubber ICM 42/60 UT model 2

The ICM 42UT and 60UT scrubbers are the 2 workhorses within our scrubber/dryer line. With a working width of 120 and 150 cm they are ideal for large surfaces.

The scrubbers both have a water content of 340 litres of clean and dirty water: you can clean many square meters without filling up with water. Available in battery, diesel or LPG version. Because the brushes are placed on the front of the scrubbing machine, you can easily clean the hard-to-reach places and you have a perfect view of your cleaning work.

Both scrubbers can be equipped with a stainless steel sweeping unit, so that any small contaminants such as pieces of pallet wood, paper and other contaminants are immediately wiped up without having to wipe them first. The scrubbing machines have a brush pressure of no less than 150 kg so that any dirt in combination with the right cleaner disappears like snow in the sun.

Advantages

- Designed for large surfaces
- Thorough cleaning
- Reliable

Specifications
