HortiMaX CX500

Flexible and expandable.

Why make things hard for yourself when you can make them easy? Running a business comes with enough challenges as it is. That's why climate control should be easy and hassle-free. The HortiMaX CX500 is ideally equipped to meet the needs of modern greenhouse businesses all over the world, without any of the unnecessary features that just add cost and complexity. It makes automated control over a range of systems and equipment simpler than ever. And it does all this using one central computer.

Simple, results-driven control

The HortiMaX CX500 can be customized to the requirements of any grower. Any functionality that you don't use is hidden. The simple configurations are easy to understand. The clear and user-friendly Synopta operating software gives you analytical insight into your greenhouse environment for results-driven control.

The right start

A reliable solution starts with a configuration that is tailored to your needs. Well begun is half done, as they say. And that's exactly how the HortiMaX CX500 works! This provides a solid foundation for a solution that you can rely on, and build on. The easy installation, modern hardware and tried-and-tested Synopta software have resulted in an advanced and dependable process computer.

No unnecessary costs

Affordability was a key factor in the design of the HortiMaX CX500. This means you only pay for the functionality that you plan to use. Installation is affordable, and upgrades are straightforward. This gives you the features, service and quality of a top brand climate computer that will grow as your business grows - but at a much lower price.

The computer that will grow along with your knowledge and ambitions

What if you need more functionality in the future? No problem! You won't need to invest in a new process computer. The HortiMaX CX500 will grow as your business grows. Together with your dealer, you can simply 'drag-and-drop' the new options that you want into your existing configuration using our user-friendly software.

Advantages

- Control over your options
- Free updates
- Integrated solution
- Modular and scalable
