Safety Cart

Adjustable greenhouse deck cleaner.

The Safety Cart is basically a gutter cart and can be extended with various modules to a multifunctional machine. You can also use it to clean and coat your greenhouse deck for example.

Thanks to its lightweight construction and electric drive, the Safety Cart can drive effortlessly over any greenhouse deck, regardless of the width of the roof. The expansion possibilities are (almost) unlimited, such as a brush set for cleaning the greenhouse cover, gutter brushes or spray booms for coating the greenhouse cover. You can use a platform to move the Safety Cart. A multifunctional machine for a modest investment.
