Silofloat

Anti algae floating cover.

De Silofloat is a floating cover for in a water storage tank. The Silofloat can cover water storage tanks with variable diameters up to 30,95 meter. When installed the Silofloat will make sure birds and ducks are kept out of the water storage. The floating roof also reduces the algae growth within the water storage tank. The cover floats on the water and moves along to the bottom of the water storage tank when the water level is getting lower. When the water storage tank gets filled the Silofloat cover will still stay on top of the water and move along to the top of the water storage tank.

Advantages

- Complete system – all parts are supplied in one installation package.
- Blocks out the sun.
- Reduces at least 95% algae growth within the water storage tank.
- Keeps birds and ducks out of the water.
- Small transport volume.
- Easy to install without any tools.
- Low maintenance.
- High UV resistance.
- Reduced evaporation.
- Cleanable.
