Sorter

Maintain Quality. Process Faster.

The Sorter is a revolution in size sorting machine for your cannabis harvest. Simple to use and gentle on your flower, our Sorter allows you to exponentially speed up your sorting process while maintaining that fine quality your cultivation is known for. Faster sorting times allow your flower to spend less time in the processing phase of your cultivation, in addition to being handled less by your staff, ensuring that your product remains as close to fresh off the stem as possible. Great care and precision went into developing our Sorter, which was built with food-grade materials like stainless steel and polyurethane. Maintain your quality while processing your flower faster with our Sorter!

Preserve Potency / Process Faster

Sorting your flower provides you with multiple advantages. First, you can trim similarly sized flower together, allowing you to easily achieve a more uniform trim. Next, using our automated Sorter will speed up the process, shortening your harvest time and the amount of time your flower spends outside of a controlled environment like a bag, bin, or storage room. Lastly, our Sorter will limit the amount of time your flower is handled by your employees, again preserving the quality for which your brand is known.

Quality Construction / Food-Safe Materials

Our Sorter is constructed from stainless steel and polyurethane, greatly reducing the chance of any contamination of your flower. Our simple-to-use design creates an intuitive sorting process with a number of available adjustments and features that allow you to control your sizing and speed throughout the sorting operation.

Innovative Design / Just Say No to Vibration

When designing the Sorter, our supplier immediately took the vibration method off the table. By using a conveyor and band system, they we're facilitating a more gentle action on your flowers that will match or exceed the sorting speed of anything in the industry, while at the same time achieving the gentle approach that has become synonymous with all equipment.

Specifications

- Dimensions (with feeding hopper): 109“L x 31.25“W x 47“H
- Dimensions (without feeding hopper): 82.5“L x 31.25"W x 44“H

CannaTechnics

- Construction: Food-Grade Stainless Steel & Polyurethane
- Weight: 300 Lbs.
- Whisper Quiet Motor
- Power: (US) 115v 60Hz at 220W 2 Amp
- Sorting Sizes: Adjustable to User Preference
- Conveyor Speed: 20 RPM
- One-Year Manufacturer's Warranty
- Made in the USA
- *All machines can be made compatible with international power requirements.
