Top Sprayer

Mechanical coating.

The Top Sprayer is the first choice of contracting companies and many growers worldwide for chalk and coating their greenhouse cover. The chalk machine is fast, safe and provides perfect coverage, regardless of the circumstances.

Light is important for optimal growth, but too much light can be harmful to the crop. With the help of a coating you can control the light in the greenhouse. For an even light distribution it is essential to apply the coating evenly. The Top Sprayer chalk machine guarantees a perfectly even result, regardless of the circumstances. You can apply both a chalk layer and the coatings of all well-known brands (Mardenkro, Hermadix, Sudlac).

Tested thoroughly

All parts of this chalk machine have been carefully selected. The technique has been thoroughly tested in practice, which translates into an optimal result, proven reliability and durability. A lot of attention has also been paid to safety, you won't find a better machine in this area. It is not without reason that all recognised contracting companies and many top growers worldwide work with the Top Sprayer.

Spray computer

For a perfect result.

An indispensable tool for any chalk machine. The spraying computer continuously monitors the flow and driving speed. There is no more waste of chalk.

The spray computer gives you the certainty that the coating is distributed with great precision over the greenhouse deck. No more spraying too much or too little: the spraying computer takes care of it all for you and prevents the waste of valuable spray fluid. A relatively small investment, which is guaranteed to pay for itself quickly.
